

Have you read Saul Alinsky's *"Rules for Radicals"* written well over fifty years ago? He religiously studied the writings and beliefs of Karl Marx and Vladimir Lenin, Hillary Clinton and Barack Obama were both students of his teachings. Alinsky was determined to convert the United States to a complete socialist/communist form of government.

Left wing educators in classroom presentations perpetually present versions of the following progressive steps essential to achieving this challenge. As we observe these steps, it appears that some are very close to being accomplished. Your thoughts???

HEALTHCARE:

"Control this and you can control the population."

We're very close already on this one now.

POVERTY:

"Increase the poverty level to be as high as possible."

Poor people are easier to control. They will not fight back when the government provides just enough essentials to help them survive. Is it already too far along?

DEBT:

"Increase the National Debt to an unsustainable level."

That allows increasing taxes which will produce more poverty. Are we there?

GUN CONTROL:

"Remove abilities for the population to stop government control."

This allows creating unstoppable Police States with both local and National control.

WELFARE:

"Take control of every aspect in the population at large."

Control food, housing and income levels. Are we getting there?

EDUCATION:

"Take control of all school curriculums from kindergarten to college along with news media content for all ages." This has been happening for many years.

RELIGION:

"Remove faith in God from Government and schools." This began in Europe and for many years now has become very evident in the United States.

CLASS WARFARE:

"Divide and polarize the masses, Wealthy against the Poor, Race against Race, Gender inequality, Authority against radicals, Religions against each other, etc." This will cause major discontent and make it easier to over tax the Wealthy with the full consent of the voting poor. It seems that we're getting there fast!!!

Now, the United States has been boldly criticized for being referred to as an "Exceptional" Nation. Those who do this make the claim that we view ourselves as superior to people in other countries. Of course this is not true. We are exceptional because we are one of only a very few countries in the entire world that recognize God, rather than Government, as the supreme Authority by which we are guided.

IN GOD WE TRUST!!!
