

With, I believe, an infinite God ordained wisdom, the founders of our country created a structure called the "*Electoral College*" as a control system to ensure that individual states were fairly represented. Otherwise one or two densely populated areas would speak for the whole nation. It was not created as a device to favor Whigs, Tories, Democrats, Republicans or any other political affiliation. It was created as a system of "*checks and balances*" to guard against any small vocal area with a specific agenda being allowed to speak for the entire nation.

The following statistics should put an end to the "Electoral College" argument!!!

There are 3,141 counties in the United States.

Trump won 3,084 counties; Clinton won 57.

There are 62 counties in New York State.

Trump won 46 counties; Clinton won 16.

Clinton won the popular vote by approximately 1.5 million votes. In the 5 counties that encompass NYC (Bronx, Brooklyn, Manhattan, Richmond & Queens) Clinton received well over 2 million more votes than Trump.

In other words, these Five (5) counties alone, more than accounted for Clinton winning the popular vote for the entire country.

These 5 counties comprise 319 square miles.

The United States is comprised of 3,797,000 square miles.

When we have a country that encompasses almost 4 million square miles of territory, it would be ludicrous to even suggest that the vote of those who inhabit a mere 319 square miles should dictate the outcome of a national election.

Densely populated cities (NYC, Chicago, LA, etc.) do not and should not speak for the rest of our country...and somehow the geniuses that founded our country understood this and created a system to avoid that circumstance.

Now you can explain the supreme importance of the Electoral College. Pass it on!
